# NuGrainB1-0002

## High-efficiency hybrid with quick emergence and dependable yield.

This hybrid has a large, red grain and high-test weight. A semi-open panicle and good head exertion allow for great threshability, while late season standability is an improvement over other ultra-early hybrids. Tillers are approximately the same height of the main panicle which helps this hybrid maintain its uniformity in the field. This hybrid has excellent resistance to anthracnose, downy mildew and head smut, which makes it a great choice for areas with high disease pressure.

### Hybrid Characteristics:

**Grain Color:** Bronze

**Plant Height:** 42-48"

**Panicle Type:** Semi-Open

### Maturity

**Maturity:** Ultra-Early

**Days to 50% bloom:** 52-54 days

**Days to Harvest:** 85-90 days

## YIELD INFORMATION

| | |
|---|---|
| Irrigated Bushels/Acre | 100-120 |
| Irrigated Pounds/Acre | 5,600-6,720 |

Yield data information is based on Nufarm and university trials across 100+ locations in a 3-5 year period.

### From the Field

**The combination of excellent drought tolerance and high yielding, ultra-early maturity will give your farm a competitive advantage over fuller season sorghums.**
