NuSilB3-0465 MS

Conventional male sterile sorghum that will only produce seed if a pollen source is available. Good for direct pasture, hay or grazing.

This conventional male sterile hybrid is a standard in the forage grass industry. It has a sweet juicy stem which will rapidly recover from harvest as direct pasture or haying. It is designed as a one cut silage for high quality producers. The hybrid has good foliar disease resistance and can be used as silage, hay or direct pasture.

Uses:	Grazing	Silage	Hay

Hybrid Characteristics:

Grain Color: Bronze

Plant Height: 72-96"

Panicle Type: MS

BMR: No

APHIBLOK

Maturity

Maturity: Early

Days to 50% bloom: 75-80 days

Days to Harvest: 70-75 days

YIELD INFORMATION

Irrigated Tons/Acre	14-18

Yield data information is based on Nufarm and university trials across 100+ locations in a 3-5 year period.

From the Field

A very versatile hybrid that can be used for silage, hay or direct pasture and it's a good choice for after frost grazing.

MANAGEMENT RECOMMENDATIONS

Great option in areas where you want to minimize pollen contamination or reduce chances for volunteers. Very good to use for pasture and hay due to its excellent re-growth ability.
