NuGrainW2-0037 FG

FOOD GRADE SORGHUM

The standard in early food grade hybrids with good yield potential under dryland or irrigated conditions.

This early maturing hybrid produces a high density, high bushel weight, white food grade grain. It has high tolerance to drought and will produce outstanding yields under dryland or limited irrigated conditions. The semi-open panicle has good exertion and is easy threshing. Leaf quality is very good and shows stay green and excellent resistance to drought. Standability is very good because of a stiff stalk and its strong deep root system.

Hybrid Characteristics:

Grain Color: White

Plant Height: 46-52"

Panicle Type: Semi-Open

Maturity

Maturity: Early

Days to 50% bloom: 58-62 days

Days to Harvest: 95-100 days

YIELD INFORMATION

Irrigated Bushels/Acre	107-140
Irrigated Pounds/Acre	6,000-7,800

Yield data information is based on Nufarm and university trials across 100+ locations in a 3-5 year period.

From the Field

This hybrid won the NSP yield contest 3 years in a row for food grade hybrids and showed great consistent results under a variety of circumstances.
