# Power Plot 61

## Early animal screen product with a dry stalk and good standability.

This rapidly growing early dry stalk forage sorghum provides the height and standability for animal screens. Because it produces high tonnage quickly, it is well suited to bioenergy, cover-crop and other specialty markets. It has also been shown to provide good nematode control.

| Uses: | Grazing | Feed | Silage | Wildlife |

## MANAGEMENT RECOMMENDATIONS

Utilitarian, used in broad ranges of situations, flexible uses, high lignin with good standability. It is not recommended for direct animal feed. Usage only as cover/habitat/green manure (energy production).
