

What is Nuseed Monola?

Monola oil is a healthy alternative to cooking oils that have high levels of saturated and trans fats.

The main difference between Monola and Canola is that Monola's oil profile remains stable during the prolonged use at high temperature, making it ideal for end users such as fast food frying.

Why switch to Nuseed Monola?

Monola is leading the way in the fight against foods cooked in oils containing high levels of saturated and trans fats. By growing Monola you are contributing to a healthier Australia, whilst adding value to your bottom line.

Nuseed Monola health

Palm	51% Saturated Fat
Tallow	48% Saturated Fat
Cottonseed	26% Saturated Fat
Monola	<7% Saturated Fat

COMPARISON OF OILS

	Monola	Hi Oliec Sunflower	Canola	Palm Oil
Total Sats (%)	6.9	9.2	8.3	50.7
Total Trans (%)	0.1	0	0.9	0.1
Sats + Trans (%)	7.0	9.2	9.1	50.8
