

# HyTTec® Velocity

Our earliest-maturing hybrid TT canola, offering improved harvest management for farmers.

## It just keeps getting better - HyTTec® Velocity is an earlier alternative to other varieties without compromising paddock performance.

HyTTec® Velocity is the fastest variety in our HyTTec® family, delivering high performance in fast-growing regions.

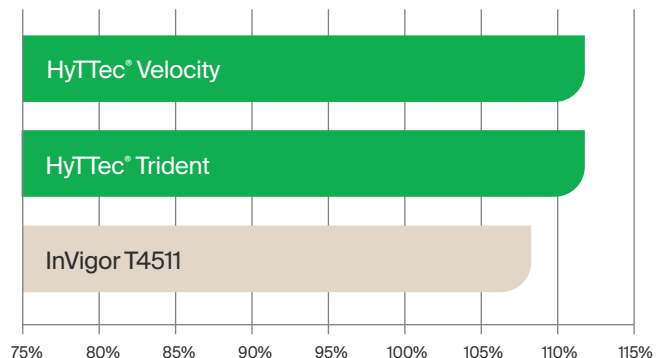

With a medium plant height and improved pod shatter tolerance, HyTTec® Velocity offers an enhanced harvesting experience for farmers.

HyTTec® Velocity is an early-maturing variety that exhibits impressive early vigour, along with competitive yield and oil performance in trials, delivering growers a strong return on their seed investment.

### Key Points

- HyTTec® Velocity is an early-maturing line and the fastest variety in the HyTTec® range.
- With its medium plant height and improved pod shatter genetics, it shows improved harvestability over other lines.
- It possesses good early vigour for strong establishment and increased weed competition.
- HyTTec® Velocity is well-suited to fast-growing canola regions.

### Variety Performance (Yield Graph)

Long-term predicted yield from all WA Low to Mid rainfall Triazine Tolerant NVTs. NVT MET data sites where all varieties represented 2024

### Description

<b>Maturity</b>	Early
<b>Blackleg Rating*</b>	MR
