2025/2026 SEASON

NUFARM CANOLA GUIDE

NEW

Vesta IMI

Balance the Risk.
Boost the Return.

Introducing New Vesta IMI, Nufarm Seeds' new early-mid maturing IMI hybrid, delivering strong yields and leading oil content.

NEW

Chronos TFI

Trusted TruFlex® performance
now with IMI flexibility.

New Chronos TFI combines TruFlex® and IMI tolerance in one hybrid, offering growers greater flexibility and effective weed control.

Nufarm Seeds - 2025/2026 Season Canola Varieties

Variety	Herbicide Trait	Breeding Type	Maturity	Blackleg Rating*	Blackleg Resistance Group	Height	Oil	Seedling Vigour (1 poor - 9 very high)	Standability (1 poor - 9 good)	Pod Shatter Tolerance**	Alternative To	Recommended Target Yield

*2025 Autumn Blackleg Rating bare
**Anticipated based on Nuseed internal trials
^Rated from Susceptible to Tolerant using our proprietary shaking methodology
^^New line limited data
#HyTTec Trident not recommended for yield environments 2.5 T or above
##Not recommended for early sowing in a high yield environment

Challenge the Status Quo

Nufarm Seeds' IMI hybrids, including Ceres IMI and New Vesta IMI, offer early to early-mid maturity options that deliver where it matters: strong yields, class-leading oil content, and good disease resistance. Backed by proven genetics and tailored for diverse growing conditions, they're smart, confident choices for modern IMI systems.

Strong blackleg resistance is essential in IMI-tolerant canola varieties to protect yield potential and maintain long-term crop viability. As IMI herbicide-tolerant systems are often used in high-risk blackleg environments due to tight rotations or stacked resistance pressures, having robust and durable blackleg protection is critical.

Blackleg Comparison

	Blackleg Rating*	Blackleg Resistance Group
NEW Vesta IMI	RMR **	ABD **
Ceres IMI	RMR	AD
Pioneer® 44Y94 CL	RMR	BC
Hyola® Solstice CL	R	ADFH
Pioneer® 43Y92 CL	RMR	B
Pioneer® PY421C	RMR	A
