

NUFARM MONOLA

A HEALTHY ALTERNATIVE

What is Monola?

Monola oil is a healthy alternative to cooking oils that have high levels of saturated and trans fats.

The main difference between Monola and Canola is that Monola's oil profile remains stable during the prolonged use at high temperature, making it ideal for end users such as fast food frying.

Why switch to Monola?

Monola is leading the way in the fight against foods cooked in oils containing high levels of saturated and trans fats. By growing Monola you are contributing to a healthier Australia, whilst adding value to your bottom line.

Monola health

| | |
|------------|-------------------|
| Palm | 51% Saturated Fat |
| Tallow | 48% Saturated Fat |
| Cottonseed | 26% Saturated Fat |
| Monola | <7% Saturated Fat |

COMPARISON OF OILS

| | Monola | Hi Oleic Sunflower | Canola | Palm Oil |
|-------------------------|--------|--------------------|--------|----------|
| Total Sats (%) | 6.9 | 9.2 | 8.3 | 50.7 |
| Total Trans (%) | 0.1 | 0 | 0.9 | 0.1 |
| Sats + Trans (%) | 7.0 | 9.2 | 9.1 | 50.8 |

| Monola H421TT | Early | Hybrid TT | R-MR | BC | Medium | Monola 416TT, HyTTec [®] Trophy, InVigor [®] T 4510 |
| Monola 422TT | Early/mid | OPTT | MR | BC | Short | Monola 420TT, ATR Bonito, ATR Bluefin |

¹2025 Autumn Blackleg Rating Bare. [#]A minimum fatty acid profile is required to meet Monola specifications as per the Monola Grower's Contract.

MONOLA DELIVERY SITES

Delivery sites subject to change.

Premium payments

In 2026, Monola growers in the GrainCorp growing zone will receive a premium payment of \$200/mt at harvest.

Secure market options

Increasing consumer demand for healthier dietary options means that large-scale food manufacturers are looking for consistent supply of healthier ingredients.

Demand for Monola oil is growing each year, both domestic and internationally.
