

PodVault®

Lock-in Your Yield with Confidence

What is PodVault®?

PodVault® is Nufarm's trusted indicator of improved pod shatter tolerance in canola varieties. When you see the PodVault® Lock, you know your crop is backed by a scientifically validated rating system. The result is lower seed loss during harvest.

Why Does Pod Shatter Matter?

- **Seed loss hurts your bottom line.** Every pod that shatters before harvest means less yield and less profit.
- **Weather and timing can't always be controlled.** Wind, heat and delayed harvest increase the risk of pod shatter.

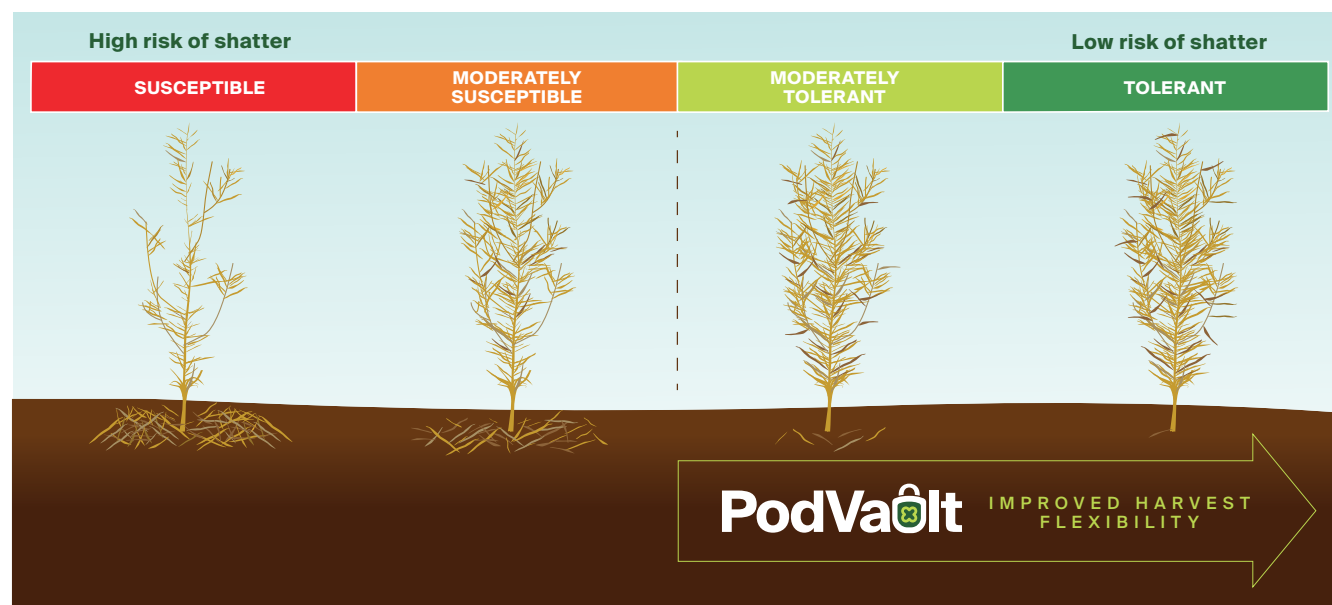

What PodVault® Means for You

- 1 Harvest with confidence.** PodVault® varieties are tested and proven to offer improved pod shatter tolerance.
- 2 More flexibility at harvest.** Extra protection means less stress if harvest timing shifts.
- 3 Better returns.** Reduced seed loss = more grain in the bin.

How Does It Work?

- Nufarm has developed a **peer reviewed, scientifically validated rating system** that measures pod strength and resistance to shattering.
- **How the test works:**
 - 1** Harvest 20 mature pods
 - 2** Pre-condition the pods at 40 degrees for 24 hrs
 - 3** Put the pods in a container in a Geno/Grinder® at 1,000 RPM for 30, 60, 90 secs and score shatter after each interval
 - 4** Translate scores into ratings with only varieties scoring Moderately Tolerant or higher labelled as PodVault®
- Only varieties that meet strict performance standards earn the PodVault® Lock.

Relative Shatter Performance of Canola Under Pressure

Developed by Nufarm – Trusted by growers

Hunter TF

- Australia's #1 selling TruFlex® variety
- Lock-in your yield with PodVault®
- The Yield you know, the Flex you need

Eagle TF

- Reliable Yields
- Lock-in your yield with PodVault®
- Strong Blackleg resistance

Look for the
PodVault® Lock

When choosing your next canola variety, look for the PodVault® Lock symbol. It's your assurance of improved pod shatter tolerance and peace of mind at harvest.
