

## N4H161 CL

ULTRA-EARLY FOR SHORT GROWING SEASONS

This ultra-early high oleic is the perfect hybrid for Northern climates with short growing seasons or in the High Plains for a double crop option. With a shorter plant height, N4H161 CL has excellent root strength and late season plant health.

PRIMARY MARKET: **HIGH OLEIC CRUSH**

SECONDARY MARKET OPTIONS: **BIRD FOOD**

HERBICIDE TRAIT: **Clearfield**

DOWNY MILDEW RESISTANT: **Yes**

MATURITY: **Ultra-Early / Group 1**

### MANAGEMENT RECOMMENDATIONS

- Recommended planting rate: 22,000-24,000 plants per acre
- Best for those areas with short growing seasons, late plantings or double crop.
- Good candidate for desiccation

An early hybrid like N4H161 CL that flowers 5-6 days earlier than anything else in the Nuseed lineup gives a grower additional planting flexibility without sacrificing yield!

ALISON POKRZYWINSKI, NA SUNFLOWER PRODUCT MANAGER

### KEY FEATURES

High oleic, Beyond herbicide tolerant

Earliest maturity in the Nuseed lineup

Excellent yield and oil content for maturity

Short plant height
