

NC471 TF

THE LEADER IN BLACKLEG RESISTANCE

Nuseed is a global leader in canola genetics and trait development. NC471 TF has been developed for North American grower needs and has shown exceptional blackleg resistance. Together with the benefits of TruFlex technology, NC471 TF will provide growers a new level of protection against one of the most detrimental diseases of canola.

MATURITY: Medium (Nuseed Group 4)

HEIGHT: Medium-Tall

SEED COLOR: Black

DISEASE PACKAGE

BLACKLEG: Multi-gene Resistant

FUSARIUM WILT: Resistant

KEY FEATURES

TruFlex® Canola with Roundup Ready® Technology

Excellent blackleg resistance

High yielding

Harvestability ease

YIELD % OF 45H33 - 14 LOCATIONS

"NC471 TF is a major step forward in Blackleg resistance in North America. Utilizing multiple major resistance genes combined with minor gene genetic tolerance provides superior defence against a wider range of blackleg strains. NC471 TF will be a great toll to protect canola yields from disease."

EARLY SEASON VIGOR  8

STANDABILITY  7

Hybrid Rating Scale 1=Poor, 9=Excellent

SEED TREATMENT

NC471 TF is treated with Prosper EverGol to protect your seed investment against early season disease and insects.

TruFlex[®] CANOLA

IMPROVED CONTROL
OF TOUGH WEEDS

The flexibility of the TruFlex canola system will allow for the control of harder-to-kill weeds like cleavers, foxtail barley and wild buckwheat. It will also help enable season-long dandelion control.

FLEXIBILITY IN SPRAY RATES
AND TIMING

TruFlex canola will have a wider application window than our current technology. If weather or a late flush of weeds delays your spray date, no problem – you will be able to spray up to first flower* when applying sequential rates of 0.67 L/ac. The TruFlex canola system will also enable flexibility with your Roundup WeatherMAX[®] herbicide application rate to help get the job done.

HIGHER YIELD POTENTIAL
THROUGH GENETICS AND
CROP SAFETY

New genetics have packed a lot of yield potential into each TruFlex canola seed. New advances in trait technology will help enable better weed control and crop safety compared to Roundup Ready canola. It's a combination that could give you the opportunity to see much more yield potential at harvest time.

*First flower is when 50% of the plants in the field have no more than one flower.
