

N4H161 CL

SUNFLOWER

ULTRA-EARLY FOR SHORT GROWING SEASONS

This ultra-early high oleic is the perfect hybrid for Northern climates with short growing seasons or in the High Plains for a double crop option. With a shorter plant height, N4H161 CL has excellent root strength and late season plant health.

PRIMARY MARKET:

HIGH OLEIC CRUSH

SECONDARY MARKET

OPTIONS: BIRD FOOD

HERBICIDE TRAIT: Clearfield®

DOWNY MILDEW RESISTANT:

Yes

MATURITY: Ultra-Early/Group 1

Key Features

High oleic, Beyond herbicide tolerant

Earliest maturity in the Nufarm lineup

Excellent yield and oil content for maturity

Short plant height

MANAGEMENT RECOMMENDATIONS

Recommended planting rate: 22,000-24,000 plants per acre

Best for those areas with short growing seasons, late plantings or double crop.

Good candidate for desiccation

An early hybrid like N4H161 CL that flowers 5-6 days earlier than anything else in the Nufarm lineup gives a grower additional planting flexibility without sacrificing yield!

- JED WALL, NUFARM FIELD SALES TEAM MANAGER

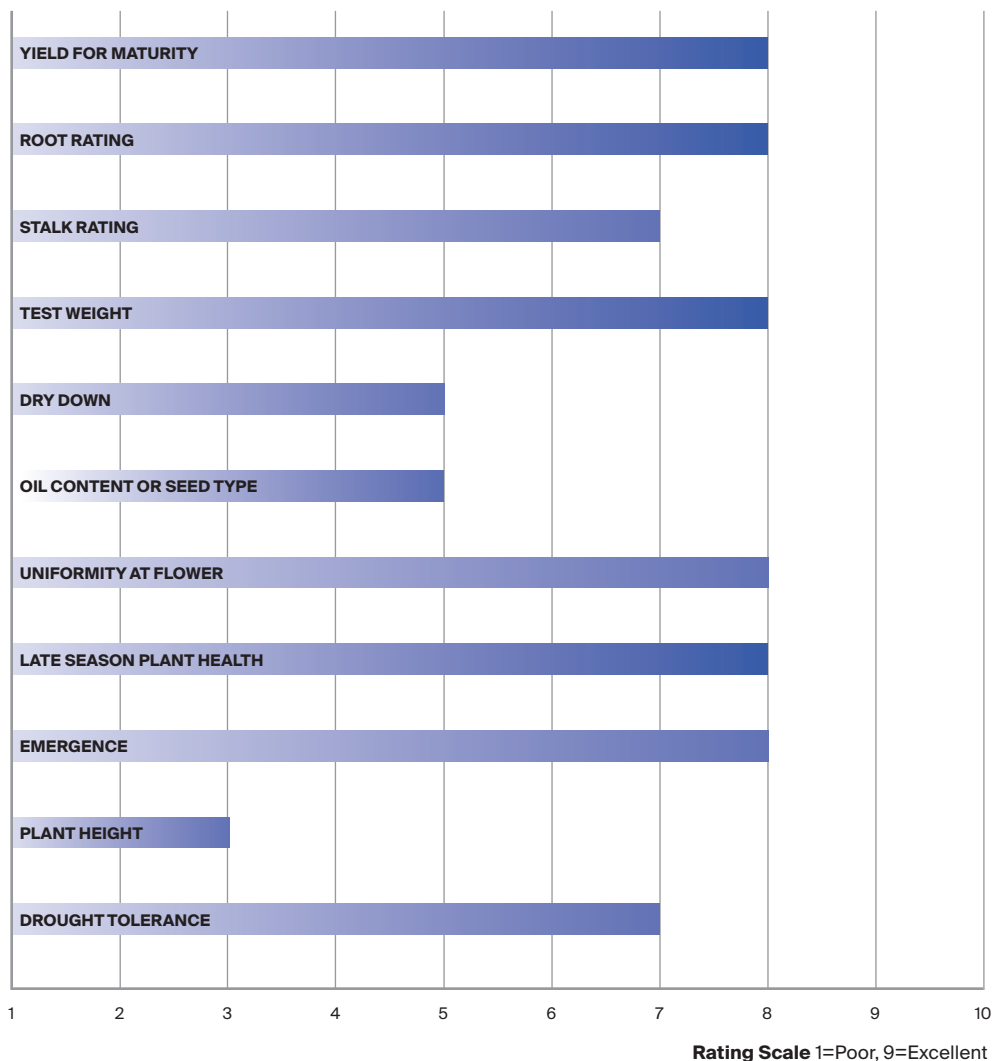

Evolving Ag

Seed Treatment

Nufarm hybrids are treated with fungicide and insecticide seed treatment to protect your seed investment.
