

SORGHUM

N2G102 (419X124)

**Stable and high yielding,
even in poor soils.**

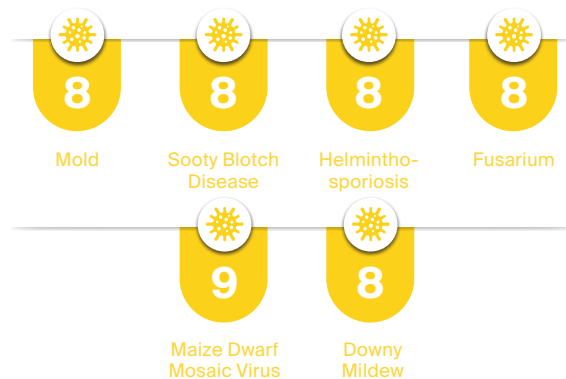

This high yielding hybrid is resistant to diseases and straightforward to grow with the potential for early harvesting. 419X124 (N2G102) is a red grain sorghum hybrid with no tannins.

Key features:

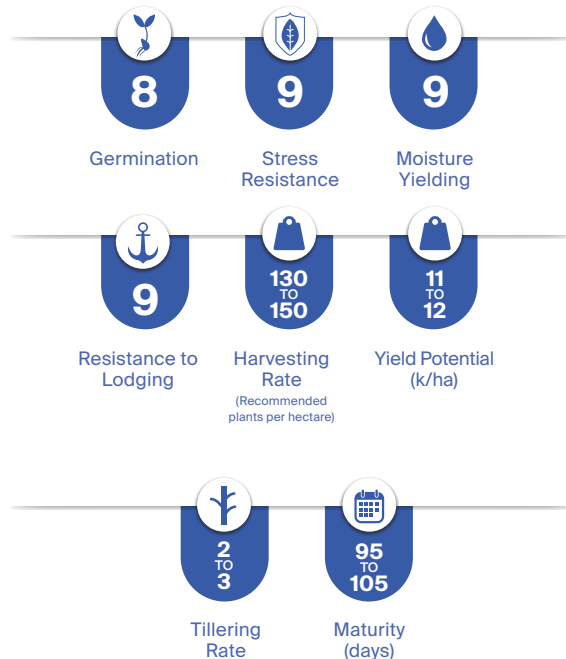

- Early.
- Stable and stress resistant.
- Intensive.
- Good for early harvesting programs.
- Tolerant to low-fertile and alkali soils.
