

NEW N4H309 E

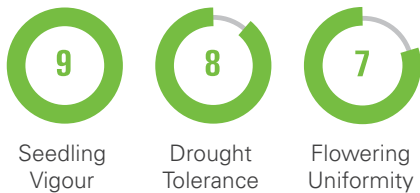

N4H309 E is an Express®, mid-early and disease resistant high oleic hybrid. A great fit for every farm. With excellent disease resistance including protection against multiple races of downy mildew, N4H309 E is a hybrid you can rely on.

- Mid-early, high oleic type
- Express® herbicide tolerant
- Excellent seed set
- Under best agricultural practices, high oleic levels can reach up to 90%
