

# Sorghum > Cereal

## 419X124

Red grain sorghum hybrid.  
Does not contain tannin. Resistant to diseases and unpretentious in cultivation with possibility for early harvesting.  
High yielding.

- early
- stable and stress resistant
- good for early harvesting programs
- tolerant to low-fertile and alkali soils

Key Features:

### Disease resistance :

Mold

Sooty blutch disease

Helminthosporiosis

Fusarium

Downy mildew

Maize dwarf mosaic virus (MDMV)

### Crop features:

Germination

Stress resistance

Maturity Range: Early 97-105 days

### Agronomical features:

Moisture-yielding ability

Resistance to lodging

Recommended density (as per harvesting, tsnd plants/ha)
