

OIL - LINOLEIC N4L215 E

High performance and early harvest.

N4L215 E is our new linoleic hybrid that performs well across the regions. Its early harvest gives the grower the option of more time to prepare for the winter crop and to avoid drought conditions, or later planting. With excellent downy mildew disease resistance and sulfonlurea herbicide tolerance, N4L215 E is a hybrid you can rely on to provide high yields with low inputs.

Key features:

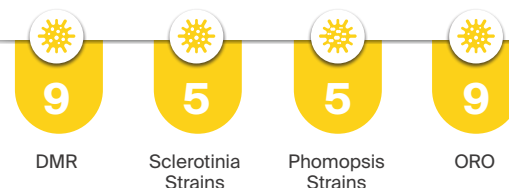

- Advanced resistance to the multiple races of downy mildew.
- Advanced genetic resistance to orobanche.
- Highly reliable and stress-free to grow.
- Advanced traits to support the grower.
