

# OIL - LINOLEIC N4L467 E

## Advanced hybrid with key technologies.

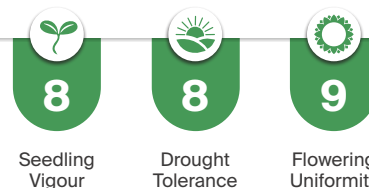

N4L467 E offers all available technologies at the right stage of development for growers. Its broad adaptation across the EU and strong downy mildew resistance make it well-suited for early planting locations. In addition, Orobanche H resistance provides extra support for growers facing challenging field conditions.

### Key features:

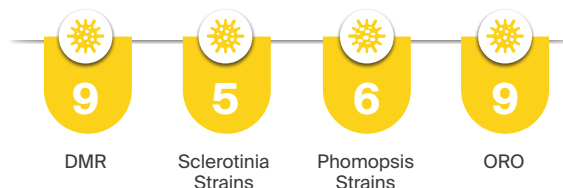

- Advanced genetic resistance to orobanche.
- Advanced resistance to multiple types of downy mildew.
- Good late season health.
- Advanced traits to support the grower.

## Performance Potential

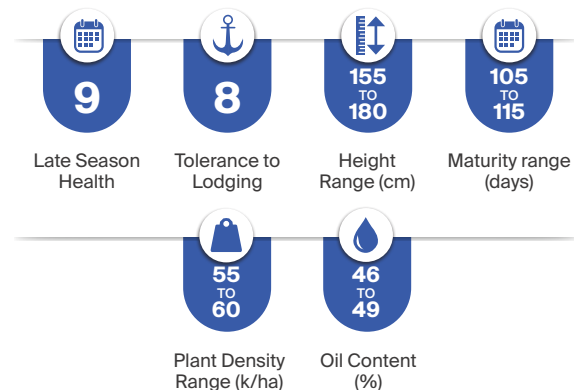

## Disease Resistance
