

High-Efficiency Hybrid With Quick Emergence and Dependable Yield

This hybrid has a large, red grain and high-test weight. A semi-open panicle and good head exertion allow for great threshability, while late season standability is an improvement over other ultra-early hybrids. Tillers are approximately the same height of the main panicle and helps this hybrid maintain its uniformity in the field. This hybrid has excellent resistance to anthracnose, downy mildew and head smut, which makes it a great choice for areas with high disease pressure.

Hybrid Characteristics:

Grain Color: Red

Plant Height: 42-48"

Panicle Type: Semi-open

Maturity

Maturity: Ultra-Early

Days to 50% bloom: 52-54 day

Days to Harvest: 85 - 90 days

MANAGEMENT RECOMMENDATIONS

This hybrid is great in double-crop systems and also in situations to escape drought in longer season conditions.

From the Field

The combination of excellent drought tolerance and high yielding, ultra-early maturity will give your farm a competitive advantage against fuller season sorghums.
