MOJO OPAL DT

Take the advantages of MOJO Pearl as the leading silage sorghum hybrid and add the Double Team trait to provide the added advantage of herbicide tolerance for grass control and you have MOJO Opal.

MOJO Opal was developed to compliment MOJO Pearl to continue the MOJO Seed heritage of high quality, high tonnage, early silage hybrids with large grain size, but now incorporating the Double Team herbicide resistance trait. Like MOJO Pearl, MOJO Opal produces high silage, starch and energy that growers have come to expect from MOJO and MOJO Pearl.

Uses: Grazing | Feed | **Silage**

Hybrid Characteristics:

Grain Color: White

Plant Height: 65-79"

Panicle Type: Grain

BMR: No

Trait: Double Team Sorghum Cropping Solution | DT.TRAIT | FirstAct.

APHIBLOK

Maturity

Maturity: Early

Days to 50% bloom: 70-75 days

Days to Harvest: 100 days

YIELD INFORMATION

Irrigated Tons/Acre	25-30

Yield data information is based on Nufarm and university trials across 100+ locations in a 3-5 year period.

From the Field

A great hybrid that allows for flexibility of over the top grass weed control, silage quality, starch, and energy are at a level normally not reached in a sorghum silage. The utilization of the starch and energy is at an optimal level. High yields with large kernel to allow more efficient kernel processing, grain with enhanced protein content, and a better starch utilization.
