MOJO PEARL

Possibly the perfect sorghum silage that combines yield, maturity, fantastic grain quality with the standard for SCA tolerance.

MOJO Pearl combines an early maturity of approximately 100 days with high tonnage, industry leading silage quality, starch, and energy level to provide the leader in sorghum silages. With its large grain size, it is easier to kernel process and results in improved utilization. Stacked with both non preference and genetic tolerance to sugarcane aphids, MOJO Pearl has unmatched tolerance.

Uses: Grazing | Feed | **Silage**

Hybrid Characteristics:

Grain Color: White

Plant Height: 65-84"

Panicle Type: Grain

BMR: No

Maturity

Maturity: Early

Days to 50% bloom: 70-75 days

Days to Harvest: 100 days

APHIBLOK+

YIELD INFORMATION

Irrigated Tons/Acre	25-30

Yield data information is based on Nufarm and university trials across 100+ locations in a 3-5 year period.

From the Field

A combination of excellent fiber quality, high starch and energy translate to industry leading output for the dairy and feedlot producer.

MANAGEMENT RECOMMENDATIONS

Unmatched in SCA, early maturity and high yielding hybrid. Large grain for efficient kernel processing, white food grade grain with no tannins, high foliar disease tolerance, high quality forage sorghum with optimum yields and high grain to biomass ratio, pre and post flowering drought tolerance, strong non-preference and tolerance to white sugarcane aphids.
