NuGrainB3-0101

Medium-early hybrid with slightly taller stature and large stalk for standability and large grain with high yield potential.

This medium-early maturity hybrid is an excellent choice for dryland production, but also yields well under irrigation. The semi-open panicle has excellent exertion and the large grain threshes very easily. Leaf quality is very good and shows excellent resistance to drought and diseases. Standability is very good because of a stiff stalk and its strong deep root system.

Hybrid Characteristics:

Grain Color: Red

Plant Height: 52-58"

Panicle Type: Semi-Open

Maturity

Maturity: Medium-Early

Days to 50% bloom: 64-66 days

Days to Harvest: 100-105 days
