NuGrainW2-0805

Early white hybrid with good standability, large grain size and yield potential.

This early hybrid is targeted for dryland production, however has the flexibility to yield well under irrigation. The semi-open panicle has excellent exertion and the large grain threshes very easily. Leaf quality is very good and shows excellent resistance to drought and diseases. Standability is very good because of a stiff stalk and its strong deep root system

Hybrid Characteristics:

Grain Color: White

Plant Height: 48-54"

Panicle Type: Semi-Open

Maturity

Maturity: Early

Days to 50% bloom: 60-63 days

Days to Harvest: 95-100 days

APHIBLOK

YIELD INFORMATION

Irrigated Bushels/Acre	110-130
Irrigated Pounds/Acre	6,200-7,300

Yield data information is based on Nufarm and university trials across 100+ locations in a 3-5 year period.

From the Field

Flexible, high yielding white hybrid with excellent aphid tolerance, great standability and disease package with large grain size.
