NuGrazN4-0473 PPS BMR

SORGHUM X SUDAN

Outstanding BMR PPS forage sorghum that combines the high yielding capability of a photoperiod sensitive with the Brown Mid Rib trait for higher digestibility and plant utilization.

NuGrazN4-0473 PPS BMR is a medium tall plant with strong stems, very high water use efficiency and high tolerance to leaf diseases. Its wide and long leaves produce dense canopy for high leaf to stem ratio.

MANAGEMENT RECOMMENDATIONS

Its high dry matter yield allows this hybrid to be used for different purposes, silage, green chop, grazing and hay. The BMR trait maintains the forage quality in all cycles, maximizing the use for different purposes. For silage purposes, it is recommended to use pre-dried to reduce the water in the silage.
