NuSilB3-0027

Conventional high yielding full season brachytic silage sorghum. Its high grain to stover ratio provides increased tons and outstanding digestibility.

This high yielding full maturity conventional forage sorghum produces a high grain yield on strong sturdy stems 6-8 feet tall. Its high grain to stover ratio significantly increases digestible dry matter produced per unit area as silage. Its high protein and total digestible nutrients make this a perfect forage for the feedlot or dairy.

Uses: Grazing | Feed | **Silage**

Hybrid Characteristics:

Grain Color: Red

Plant Height: 72-96"

Panicle Type: Grain

BMR: No

APHIBLOK

Maturity

Maturity: Full

Days to 50% bloom: 85-90 days

Days to Harvest: 115-120 days

YIELD INFORMATION

Irrigated Tons/Acre	25-30

Yield data information is based on Nufarm and university trials across 100+ locations in a 3-5 year period.

From the Field

Both feedlots and dairies benefit from the high grain to stover ratio, high digestibility, protein content and yield.

MANAGEMENT RECOMMENDATIONS

A non BMR, full season hybrid that offers higher yield potential when grown in longer season regions.
