NuSilB4-0430 MS BMR

BMR full season male sterile hybrid that is exceptionally sweet providing a good option for hay, grazing or silage.

This is a full season BMR male sterile that produces little to no grain which allows a substantial buildup of non-structural carbohydrates in the stems and leaves throughout the growing season. This results in an entire plant that is palatable to cattle. Its high yield potential makes it a great option for silage with no grain.

Uses:	Grazing	Hay	Silage

Hybrid Characteristics:

Grain Color: Red

Plant Height: 96-108"

Panicle Type: MS

BMR: Yes

APHIBLOK

Maturity

Maturity: Full

Days to 50% bloom: 95-100 days

Days to Harvest: 90-95 days

YIELD INFORMATION

Irrigated Tons/Acre	25-30

Yield data information is based on Nufarm and university trials across 100+ locations in a 3-5 year period.

From the Field

An excellent very versatile BMR hybrid can be used for silage, hay or direct pasture.

MANAGEMENT RECOMMENDATIONS

Great option for when you want a BMR but want to minimize pollen contamination or reduce chances for volunteers. Very good for pasture and hay use.
