Power Plot 61

Early animal screen product with a dry stalk and good standability.

This rapidly growing early dry stalk forage sorghum provides the height and standability for animal screens. Because it produces high tonnage quickly, it is well suited to bioenergy, cover-crop and other specialty markets. It has also been shown to provide good nematode control.

Uses:	Grazing	Feed	Silage	Wildlife

Hybrid Characteristics:

Grain Color: White

Plant Height: 120-160"

Panicle Type: NA

BMR: No

Maturity

Maturity: Early

Days to 50% bloom: 65-70 days

Days to Harvest: 70+ days

MANAGEMENT RECOMMENDATIONS

Utilitarian, used in broad ranges of situations, flexible uses, high lignin with good standability. It is not recommended for direct animal feed. Usage only as cover/habitat/green manure (energy production).
